

PORTABLE POWER

THE RUGGED STANDARD IN PORTABLE POWER DISTRIBUTION

The Nomad Power Distribution system provides a rugged and reliable temporary power solution for construction sites, indoor and outdoor events. Each Nomad product has the flexibility to interconnect with any other product in the range, or to be used as an individual power centre.

Nomad products are supplied with a range of outlets to suit most requirements. In the larger models there is a combination of three phase 400V outlets for welders, motors and machinery, and single phase outlets for power tools, lighting or other 230V devices.

NOMAD R SERIES

Designed to protect the tradesman and site worker, the compact Nomad R Series products are supplied with a range of socket and plug configurations to suit the varying requirements of a modern building site.

The Nomad R10 complies with AS/NZS 3012 and AS/NZS 3190 electrical standards and features IP55 weather protected sockets. All Sockets are 30mA RCD and overcurrent protected. Approved for use on construction and building sites.
